PRESS RELEASE

Plascoat receives NSF drinking water approval

Plascoat, the global market leader in thermoplastic powder coatings, has now received full NSF drinking water approval for **PPA 571HES Blue 536**. The NSF / ANSI Standard 61 Drinking Water certification ensures that our water pipe coating product can be sold to countries that have adopted the North American standard.

Patrick Benson, in charge of North American sales, said "This is a great result for Plascoat and the technical laboratory staff. We can now continue developing drinking and waste water coating solutions to North American customers."

PPA 571HES offers some key solutions to water pipe manufacturers and operators and will help them reduce their long-term maintenance costs.
