PRESS RELEASE

Plascoat awarded OHSAS 18001:2007 Health & Safety accreditation

Plascoat, the global market leader in thermoplastic powder coatings, has been awarded BS OHSAS 18001:2007 Health and Safety accreditation.

OHSAS 18001 was developed to meet industry demand for an effective and robust occupational health and safety management system that can be externally assessed and certified. Plascoat UK's manufacturing facility operates at world-class standards; this internationally recognised accreditation demonstrates a structured approach to hazard identification and risk management. Plascoat was also awarded four stars for health & safety performance by the British Safety Council in November 2011.

In the words of Plascoat's Health & Safety Manager, David Hine *"The 18001 accreditation and the four stars awarded by the British Safety Council represent a great achievement for the company. Both these awards are proof that as a company we are on course to achieve our goal of creating the safest possible environment for our staff and customers"*.
